

Improve Your Internet Searching

Google

A few quick tips to help you find what you are really looking for on Google:

site:.gov → Search only for sites that end in a certain domain, such as .gov, .edu, etc.

site:website.edu → Search only within a specific website

intitle:keyword → Search only for sites that have the keyword you are looking for in the title.

“insert phrase here” → Use quotation marks to keep words together and separate phrases

-keyword → The minus sign will eliminate a particular word from your search.

~keyword → The tilde (right above the Tab key) will retrieve results that contain synonyms for your keyword.

search tools button → Use this button to limit your results. Limit by date range and click on ‘All results’ to filter the type of website you want to see.
